02 Expedition Signal Wiring Harness

Turn signal problems and diagnosis can get confusing, especially when a system shares wires and connections with the parking, warning, and braking light systems.. Most common problem sources include bulbs, wires, connectors, fuses, flasher units, and switches. So the average car owner can troubleshoot these faults with the use of a test light and, sometimes, a digital multimeter (DMM).

The third brake light is a common term for "center high mount stop lamp (CHMSL)". These signal lights are so named because they are affixed high up and centered on the back of the vehicle. Lighting may be produced by a single central incandescent bulb, neon tube stripping, or else a row or grouping of LEDs.
