Antibiotic use is widely accepted as being responsible for the selection and maintenance of antibiotic resistance. It is less obvious, however, that it is also responsible for increasing transmissibility and pathogenicity of many multiresistant bacteria and may actually be increasing the number of hospital-acquired infections (HAIs).

**Antibiotic policies to control hospital-acquired infection ...**

Antibiotics are clearly useful in moderate to severe exacerbations of COPD. However, there remains considerable controversy as to antibiotic choice, especially for initial empiric therapy of exacerbations [14, 50-52, 61].Most exacerbations nowadays are treated without obtaining sputum bacteriology and with the trend to short course antibiotic therapy, this initial empiric choice often ...
