Now connecting your Icom radios to your computer has never been easier! The USB CI-V Interface plugs into the USB port of a Windows, Macintosh or Linux computer, allowing an Icom radio (or other radios with a CI-V interface) to be connected and controlled via the CI-V (CIV) protocol.

USB CI-V Icom Interface - Black Cat Systems

Icom is an outstanding, comprehensive radio manufacturer that produces radio communication equipment of all genres, from amateur radios to terrestrial, marine and avionics radios, as well as LTE, WLAN and satellite radios.

Instruction Manual / Guides | Support | Icom Inc.

In the Icom radio menu, turn OFF CI-V Transceive. In the Icom radio menu, turn OFF AutoBaud and set it to the highest possible value. If your radio has a USB connection, check the radio menu options for anything to do with setting the CAT to the CI-V port or the USB port and make sure it is set to USB.

We connected a cord from the headphones jack on the radio to the RX in plug on the RigPi. The RigPi is connected by ethernet cable to out internet router. We can pull up the rigpi.local setup screen using a laptop on the same network. When trying to set up the radio we picked SETTINGS>Basic Radio and selected Icom 775. Then pushing "Connect ...

Re: Connecting Icom radios to RigPi

In this tutorial, I will be using a popular small GPS chartplotter - a Garmin GPSMAP 276C, and connect it to an equally popular Icom IC-M304 DSC VHF radio. The purpose of the NMEA-0183 connection is to provide position information to the DSC (emergency) function of the VHF radio, in the form of GPS LAT/LON from the chartplotter.

Boat-Project.Com - A tutorial on making a basic NMEA-0183 ...

To wire an Icom to a Garmin, you connect the Icom's NMEA IN center conductor to one of the Garmin's COM OUT wires. You then "ground" the Icom NMEA IN shield to any negative power wire. If the Icom has an NMEA OUT, you connect its center conductor to the IN wire of the same Garmin COM port number you connected the Icom NMEA IN to, and you also ground the shield of the Icom NMEA OUT.

For the last free version of HRD (version 5) some of the supported radios in Win4IcomSuite are not available. In this case, the first thing you should do is to connect to the radio with HRD (not Win4IcomSuite) using a model like the IC-7410. When you have connected, open the logbook and configure the radio pane to look like the following:
