Nicknamed "EVE" and "WALL-E" after the stars of the 2008 Pixar film, MarCO-A and MarCO-B used experimental radios and antennas, providing an alternate way for engineers to monitor the landing. The CubeSats provided information to InSight’s landing team in just 8 minutes - the time it took for radio signals to travel from Mars to Earth.

In situ resource utilization (ISRU) is a critical part of sustainable and cost-effective space exploration. This paper presents a method of extracting volatiles from ice, ice-rich regolith, and hydrated soils from the Moon, Mars, and asteroids. Planetary volatiles extractor (PVEx) is a double-walled coring auger with a heated inner wall.

Testing of the Planetary Volatiles Extractor (PVEx) ...
