Cost Effectiveness Analysis | Better Evaluation

Cost-effectiveness analysis (CEA) is a form of economic analysis that compares the relative costs and outcomes (effects) of different courses of action. Cost-effectiveness analysis is distinct from cost-benefit analysis, which assigns a monetary value to the measure of effect. Cost-effectiveness analysis is often used in the field of health services, where it may be inappropriate to monetize ...

Cost-effectiveness analysis - Wikipedia

A reader has asked about the use of these two terms: I was wondering if you would care to comment on the difference between cost-efficient and cost-effective. In both, Oxford and Webster (the free online versions), cost-effective is properly defined while the cost-efficient page points to that of cost-effective. It looks like cost-efficient is a tolerated synonym of a lesser status.

Cost-Effective vs. Cost-Efficient - Daily Writing Tips

Cost-effectiveness involves more than determining cost, it also involves assignment of a value to the outcome. To facilitate the comparison of different interventions, a standard method of cost-effectiveness analysis was developed by a task force of experts organized by the U.S. Public Health Service (PHS) (Gold, Siegel, Russell, & Weinstein ...
