D-ILA is what's called liquid crystal on silicon, or LCOS, but JVC made several improvements to basic LCOS technology to develop D-ILA. At its heart is the D-ILA device, or chip, designed and manufactured by JVC. Every JVC D-ILA projector uses three D-ILA devices, one each for red, green and blue - the three colors that are combined to create the full color palette. 1 2 3 4; What Makes D-ILA Better Than Other Technologies? D-ILA offers several advantages over other projection technologies
