### D&D 5e Monster Manual

A flying dragon lizard avoids danger by opening two large, winglike flaps of skin and gliding from tree to tree. The lizard steers and brakes with its tail. The large flaps are supported by elongated ribs which they can expand and retract. The wings are brightly colored and for this reason they are also called the "butterfly lizard".

### Types of Lizards | Animal Pictures and Facts | FactZoo.com

There are more than 5600 species of lizards found on Earth. Each of them has unique characteristics with regards to their food, habitat and self-defense. Lizards have become popular pets in the western world, with species like geckos, green iguanas and anoles being the famous ones. It is very important to research well and learn about the species before you decide to keep it as a pet.
