Reactive Trainingsystem Manual.pdf - Free Download

The Reactive Training Manual has been available for over a year now. In that time, Reactive Training Systems (RTS) as a business has grown and changed a lot. A positive aspect of that growth is that more and more people are discovering RTS and seeking knowledge on the system. It is in this regard that I realized that there are many people who would like to know the basics of what this training system is all about, but in the midst of website updates, much of this information isn't readily ...

Traditional powerlifting programming is flawed. Luckily, Mike Tuchscherer's Reactive Training Systems offers a solution. Generally speaking, traditional powerlifting programs call for prescribed sets, reps, and weights. Often times, several months' worth of training is written in advance. Assuming the conditions are the same as when the program was written, and the lifter progresses at a ...

The Core-Tex Reactive Training unit comes complete with the base, platform with a center dow bumper, 3 highly engineered ball transfers, and handrail with 3 height adjustments. Also included in the package is an assembly and instruction manual.

Core-Tex® Reactive Trainer - Team Core-Tex

Reactive training is defined as quick, powerful movements involving an eccentric contraction (force reduction) followed immediately by an explosive concentric contraction (force production). An example would be

sitting down into a squat to load the muscles, and then explosively jumping up, as if trying to touch the ceiling.

What is Reactive Training and Why Should I Do It?

Intensities for the contest lifts were kept fairly high. In the beginning of a training cycle, they would start about 80% and then gradually increase in waves up to 92-95%. The overall pattern of intensity was linear, but it came and went in waves. All of Laddie's training was done using an RPE system to auto-regulate the weight on the bar.

Training that works is obviously important, and it's also motivating. Training that doesn't work needs to be changed. Better to spot it early so you can fit in more productive training cycles each year. + There's a lot of other stuff too. Bodyweight tracking is obviously important and useful. We have a full recovery monitoring system in TRAC.
