The MIDI Message specification (or "MIDI Protocol") is probably the most important part of MIDI. MIDI is a music description language in digital (binary) form. It was designed for use with keyboard-based musical instruments, so the message structure is oriented to performance events, such as picking a note and then striking it, or setting typical parameters available on electronic keyboards.

About MIDI-Part 3:MIDI Messages
Piano Companion It is a flexible chord and scale dictionary with user libraries and a reverse mode. Songtive is based on user feedback from Piano Companion and Chord Progression builder.

MPE (MIDI Polyphonic Expression) is a method that allows players to control multiple parameters (pitch bend, aftertouch, and vibrato) independently per note. On a traditional MIDI keyboard, for example, the Pitch Bend wheel affects all notes at once. An MPE compatible controller will allow these notes to be affected independently from one another.
