The antipodean toy markets (Australia & New Zealand) are often forgotten by westward looking toy people. Yet for toy companies who have any success in English speaking markets such as the USA, Canada or the UK, there is a fairly straightforward win 'down under' which often does not take a great deal of incremental effort or investment.

**An insiders view on toy markets:
Australia & New Zealand**

Great toys for three year olds are simple and meet the developmental needs of a child moving from babyhood to childhood. Preschoolers need toys that foster language, gross motor, and social/emotional development. Don't break the bank—find out what toys matter for this age group!

Toy is a tensor-based language that allows you to define functions, perform some math computation, and print results. Given that we want to keep things simple, the codegen will be limited to tensors of rank ≤ 2 , and the only datatype in Toy is a 64-bit floating point type (aka 'double' in C parlance).
