The good news is I have the manual and I PDF it. It is a TOS czech lathe 1958–1959. The bad news is the manual is in czech. If it was my old lathe I think it is, I did change the oil in it. With some cheap 32 hydraulic oil after draining and cleaning with kerosene. The oil that was in there was like molasses.

In 1959, we manufactured our first vertical lathe with continuous working feed, numerically-controlled axes movements and tracing. This machine was built based on TOS Hulin's proprietary design and was the first numerically controlled machine tool produced in Czechoslovakia, and also one of the first numerically controlled lathes in the world.

History - TOSHULIN

The manual states that when the carriage lever is lifted up, the lathe will run forward-is this correct? The lathe was set up to run forward when the handle was pushed down, when you bring it back the clutch disengages, and if you lift it up it brakes (as in puts on the brakes).
