We find the money for you this proper as without difficulty as simple way to acquire those all. We meet the expense of upgrade postgresql 9 3 to 9 6 1 on cool solutions and numerous ebook collections from fictions to scientific research in any way. in the middle of them is this upgrade postgresql 9 3 to 9 6 1 on cool solutions that can be your partner.

Both fiction and non-fiction are covered, spanning different genres (e.g. science fiction, fantasy, thrillers, romance) and types (e.g. novels, comics, essays, textbooks).

### Upgrade Postgresql 9 3 To

Limitations in Upgrading from PostgreSQL 8.3. Upgrading from PostgreSQL 8.3 has additional restrictions not present when upgrading from later PostgreSQL releases. For example, `pg_upgrade` will not work for upgrading from 8.3 if a user column is defined as: a `tsquery` data type. data type name and is not the first column

### PostgreSQL: Documentation: 9.3: `pg_upgrade`

For best results, however, try to use the `pg_dumpall` command from PostgreSQL 9.3.25, since this version contains bug fixes and improvements over older versions. While this advice might seem idiosyncratic since you haven't installed the new version yet, it is advisable to follow it if you plan to install the new version in parallel with the old version.

## Upgrade PostgreSQL 9.3 to 9.6 on Ubuntu 16.04 · GitHub

I'm attempting my first upgrade of Postgres from 9.3 to 9.5. I've run into two roadblocks but not sure how to get around them. I have my 9.3 PGDATA set to `/data/postgres`, which is a separate filesystem on my RHEL 6 server. After installing 9.5 and running `initdb`, I attempted to run `pg_upgrade` using this command line:

## PostgreSQL - novice - Upgrading from Postgres 9.3 to 9.5

Just replace the version (9.3) here with the old version of Postgres that you're currently using. `sudo pg_upgradecluster 9.3 main 5`. Make sure everything is working again. We can start Postgres back up again and this time it should be running the new postgres 9.6 cluster. `sudo service postgresql start`
